## Technical Skills

< HTML > < CSS > < Javascript >  
< jQuery > < Node.js >  
< Express.js > < mySQL >  
< Sequelize > < MongoDB >  
< Mongoose > < Github >  
< VSCode > < Workbench >  
< Insomnia > < Postman >  
< Bootstrap >< React>

## Education

**Full Stack Coding Bootcamp**  
University of Denver & Trilogy  
April 2020 - Present (Graduate  
October 2021)

# Hello! I am Loryn Haykus

A wildly motivated nerd who loves everything gaming, fantasy and technology. Being enrolled in the DU Coding Bootcamp in Denver, Colorado I have gained skills to bring data to life and build web pages and apps from scratch. I have gained skills in front-end and back-end development including **HTML, CSS, Javascript, Node.js, MySQL, NoSQL, MongoDB, Mongoose** and look forward to learning even more! My ability to learn quickly, my love for overcoming challenges and the satisfaction of bringing numbers and data to life is what drives me.

## Projects

### 4th Kind

Github: <https://github.com/lhaykus/4thKind>

Deployed URL : <https://the-4th-kind.herokuapp.com/>

4th kind is a full stack blog app that allows users to create their own blog and interact with other users about the supernatural! This app allows users to login, signup, create/edit/delete their own posts and comment/view other users posts. This app also features a fun interactive app that allows users to pinpoint and view sightings of UFOs around the world.

Built With: <JS><Handlebars><mySQL><Sequelize><API Requests><Bulma>

### Weather Dashboard

Github: <https://github.com/lhaykus/Weather-Dashboard>

Deployed URL: <https://lhaykus.github.io/Weather-Dashboard/>

This weather dashboard app allows users to get daily and 5-day forecasts for any location.

Built With: <JS><jQuery><API Calls><Bootstrap><Momentjs>

### Get Physical

Github: <https://github.com/lhaykus/get-physical>

Deployed URL:

<https://get-physical-fitness-tracker.herokuapp.com/?id=6130192ac065490016542980>

A NoSQL workout tracker app that users can use to create and track daily workouts! Powered by Mongoose and MongoDB, this app allows users to track the name, type, weight, set, reps and duration of exercises they have completed and are able to view their progress with a weekly chart!

Built With:

<Mongoose><MongoDB><Node.js><Express.js><Javascript>

---

## My React Portfolio

Github: <https://github.com/lhaykus/My-React-Portfolio>

Deployed URL: <https://lhaykus.github.io/My-React-Portfolio/#/>

A portfolio made with React and Material for employers to not only see my projects and skills, but to get to know a little more about me!

Built With: <React><MaterialUI>

---

## Work Experience

---

### Customer Relations

Groove Subaru Service - Englewood, CO

October 2020- April 2021

- Responsible for getting service and sales customers into rental cars while their personal vehicles are getting serviced at the dealership.
- Responsible for creating temporary registrations for the customers by imputing their information, such as drivers license and insurance, into a document.
- Responsible for the rental fleet by cleaning and disinfecting cars before and after customer use, removing and importing new cars into the fleet.
- Worked with sales with WEO customers by ordering parts and getting services done for additional accessories that were sold with a new car.
- Excel, Dealertrack, and TSD experience .
- Responsible for answering the phones and emails in a timely and professional manner.
- Deal with invoices from different vendors and having to scan them to the office.

---
